

Fireside Coatings

Fireside Coatings is a manufacturer of superior, high-quality ceramic coatings for global applications. The company also advises plant owners and their maintenance staff to help ensure maximum energy process equipment performance. By working with Fireside, these clients are able to reach top equipment reliability under extremely high temperatures and within regulatory challenges.

Products (Spray-on Ceramic Protection for Corrosion and Erosion Resistance)

Slag-X – a single component ceramic coating that withstands temperatures up to 1800 degrees F with a bond strength of 1860 psi and tensile strength of 1925 psi.

XP61-C – an advanced product with high emissivity and a thin film spray. It provides protection up to 1800 degrees F with a bond strength of 3260 psi and a tensile strength up to 3412 psi.

Optēcoat F-61 – a dual-color, sprayed-on composite ceramic coating to protect fireside boiler tubing while also acting as a visual inspection aid. It provides protection up to 1800 degrees F, bond strength of 1860 psi and tensile strength of 1925 psi.

Markets

In addition to the U.S., Fireside Coatings has provided products and services across the world, including Austria, Canada, China, Colombia, Czech Republic, Finland, France, India, Indonesia, Malaysia, Philippines, Poland, South Korea, and Vietnam.

Expertise

The Fireside Coatings Team is led by its president, Ed Lloyd. He has more than 30 years of experience in designing and applying specialized coatings for biomass and utility power generation, pulp and paper, cogeneration, and chemical processing industries. Prior to launching Fireside a decade ago, Ed led other companies where he designed and provided technical specifications for many of the protective coating systems currently being used to protect boiler tubing and other high-temperature industrial process equipment. Ed is available to consult with the media on a variety of subjects relating to the specialized coatings industry. To arrange an interview or conversation with Ed, please reach out to Fireside's media partner, Elvacomm.
